WORK EXPERIENCE & PROJECTS

Teaching assistant

Le Wagon(July - present)

Supporting instructors and students, ensuring a comprehensive learning experience, debugging code, reviewing student's code and troubleshooting.

Full-Stack Web Developer

Freelance(April- present)

Dedication to detail is essential for producing high-quality work when building your own projects

Plantaqua

This app sends notifications to users when it's time to water their plants based on the specific needs, current weather conditions.

WTT Games

Designed a web application which operates similarly to Airbnb, where users can create a profile, list, rent or lease game, set a rental price and accept or reject deal.

SoundApp

Responsive music streaming application, representing functionalities of Spotify clone.

Fintess-Center

The only project created using a website builder is called 'Tilda'. A website for a fitness center located in Moscow.

Mouse Trapper Game

Delightful and addictive mobile game that puts a twist on the classic Minesweeper concept
